

## Rapid COVID-19 Testing Consent

The following has been explained to me, and I agree:

I am consenting to rapid COVID-19 (SARS-CoV-2) testing.

Appointments for rapid testing only will not be submitted to my insurance by Lakewood Family Health. I am responsible for the full upfront cost of testing as stated below.

When rapid COVID-19 testing is performed during a scheduled healthcare provider visit, Lakewood Family Health will submit the appropriate CPT codes on behalf of the patient for potential reimbursement. I will be charged a \$50 specimen handling fee visit regardless of whether insurance reimburses full or partial payment towards my rapid test.

A positive test is considered diagnostic, and no confirmatory testing will be performed.

By law, the Texas Department of State Health Services (DSHS) will be notified that I was tested, and what the test results are.

I agree to self-quarantine 14 days after any known COVID-19 exposures.

In cases where a prescription is needed, a follow up telehealth office visit is required with an onsite healthcare provider. You must call our office at 214-821-6331 to schedule appointment.

In cases where symptoms are strongly suggestive of COVID-19, a repeat test on another day may be recommended alongside send out PCR confirmatory testing. This will require an additional appt with an onsite healthcare provider. PCR testing may take up to 7 days for results to be released will be notified by phone, text, or email when my confirmatory test results are received.

Lakewood Family Health offers two types of Rapid (15 min) Onsite Testing. The testing options are based on available stock from each manufacture. Due to the pandemic, both tests may not be readily available when you present for your test. We have no control whether we will be able to offer both options at any given time. Thank you for understanding.
